

NEUROLOGICS

OPTIMIZE YOUR BRAIN
FOR PEAK PERFORMANCE

THOUSANDS OF SUCCESS STORIES:

NEUROLOGICS NEUROENGINEERING®

*helps people struggling with concussions, learning
and attention issues, addiction, and more.*

"This has changed my life."

A.R.

*"I had tried everything to stay sober
and had not been able to be
successful. The only thing that was
different this time was the addition
of neuroengineering. I have 18
months of total abstinence and
no relapse."*

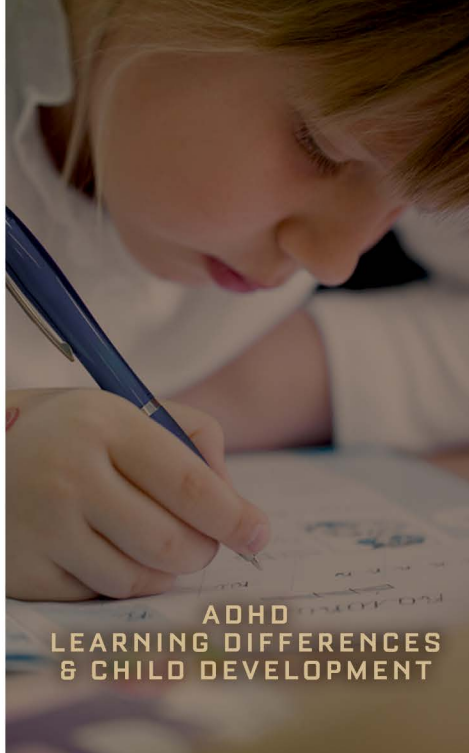

J.E.

*"I had learning issues diagnosed
when I was a child. I wish I had been
able to do this back then. The Brain
Map made sense of my whole life.
I could feel the neurotraining
exercises start to work within the
first month. Now I am in college
which no one ever thought
would be possible."*

C.J.

& CHILD DEVELOPMENT**

MAXIMIZE YOUR POTENTIAL

Accurate Assessment + Neurologics Neuroengineering® = Improved Performance

**ADDICTION
& RECOVERY**

**PEAK
PERFORMANCE**

PHASE ONE:

ACCURATE ASSESSMENT

Precise brain mapping gives an accurate assessment.

Individual Report of Findings contains a custom neuroengineering program designed for specific needs.

Electroencephalogram (EEG) technology has been around for almost a century, but technological limitations prevented scientists from using EEG data to create practical applications for humans.

Neurologics Brain Mapping is the most technologically-advanced, comprehensive brain assessment in the world. Quantitative Electroencephalogram combines traditional EEG with proprietary software that creates a precise assessment, with unmatched accuracy.

Neurologics analyzes signals from two hundred and ninety-three activities in the brain using best-in-class software.

Individual results are compared with multiple data sets compiled by renowned research institutions such as the National Institutes of Health (NIH) and New York University. Test results form the basis of the Individual Report of Findings.

A total brain health assessment, with results you can feel in real life.

Please Note: Clients may participate in Phase One only and receive a personalized Brain Map and unequivocal, objective assessment. Most continue to Phase Two for targeted neuroengineering where they experience life-changing improvements in brain function.

PHASE TWO:

TARGETED NEUROENGINEERING

Neuroengineering at home,
office, or on the road.

Ongoing evaluation and
refinement ensures
neuroengineering plans
keep pace with the
improving brain.

Neurologics Individual Report of Findings empowers clients to begin a customized qEEG optimization plan designed by an experienced team of neurologists, computer engineers, and behavioral scientists. Expert clinicians guide a series of sessions that pair specific brain-training exercises with real-time qEEG analysis. Cognitive tasks are performed from the comfort of home, office, dorm, or hotel room while measuring brain activity.

Neurologics Neuroengineering® unleashes radical improvements in brain performance. Data from these sessions is used to refine and perfect training exercises over time. A client's personalized optimization plan evolves through the optimization process. The brain learns, grows, and reaches an optimal level of performance that can transform a client's life.

NEUROLOGICS
Your Brain Optimized®

The Brain is the Brain is the Brain™.

855.814.4983 | INFO@NEUROLOGICS.COM

*Neurologics uses FDA-approved technology
and offers custom-designed, drug-free
neuroengineering solutions preferred by
Olympians, professional athletes, and
world-renowned scientists. Selected by MIT
as a top innovator in behavioral neuroscience.*
